**Libraries :** Mongoose, JWT, Passport, Socket.IO, Redux

## PROFESSIONAL EXPERIENCE

### Appmox, Software Engineer

2023 - Present

- Contributed to the development of a web application utilizing low-code technology, Angular, and NestJS, seamlessly integrating with SAP to display data in the user interface.
- Facilitated order placement and bid submission for commercial and technical products, with the ability for buyers to select preferred vendors. Implemented bid management for vendors, enabling buyers to choose optimal bid prices.
- Incorporated features for managing shipment details and offered flexible payment options, including monthly or one-time settlements.

## PROJECTS

### Global Prostate Solutions

2023

- Developed a responsive web application utilizing React, enhancing accessibility in healthcare equipment rentals and sales.
- Managed seamless API integrations for efficient data exchange, ensuring dynamic functionality.
- Implemented Redux for scalable state management and maintainability of the project setup.
- Led UI development, prioritizing user experience and operational efficiency in interface design.

### Rental Car Management System

2022

- Developed a web page utilizing ReactJS, NodeJS, MongoDB, and ExpressJS, with JWT for Authentication within an MVC architecture.
- Designed a web application for managing and inputting car details while displaying available cars on a webpage.
- Implemented a feature enabling the display of the most rented car to the company owner, facilitating informed decisions on expanding the car inventory for increased profitability.
- Spearheaded the entire application lifecycle, including planning, requirements gathering, and development.

## EDUCATION

### Bachelor of computer science

LBS College Of Engineering Kasaragod, Kerala

### Pre University

Govt Vocational Higher Secondary School, Kasaragod

## LANGUAGES

English, Malayalam, Hindi, Tamil
